Dear Hiring Manager,

I am writing to apply for the Scrum Master position. I hold a Bachelor of Science in Computer Science and have experience in software development, IT support, and technical instruction. Throughout my career, I have worked closely with teams to deliver technical solutions, solve operational challenges, and support continuous improvement initiatives.

My background as a Full Stack Developer and IT Application Support Administrator has provided me with a strong understanding of Agile development environments, collaboration, and problem-solving. In addition, my experience as an IT Teacher has strengthened my communication, mentoring, and leadership skills, which are essential for facilitating Scrum teams and promoting Agile values.

I am eager to contribute my technical expertise, organizational skills, and passion for Agile practices to your organization while continuing to grow as a Scrum Master.

Thank you for your consideration. I look forward to the opportunity to discuss my qualifications further.

Sincerely,
Samuel Eshete
